

The World's Most Luxurious Beds For the Best Sleep Imaginable

We spend over a third of our lives in bed, however, many people underestimate the power of getting a good night's sleep. A good night's sleep can improve one's memory, improve the immune system and even slow down the ageing process.

Sleep shortage is one of the most common 21st century health complaints. According to research by the National Sleep Council, only 1 in 10 of us say we always sleep well; 1 in 5 suffer from lack of sleep and two thirds say we get less sleep now than we did a few years ago.

Hästens prides itself on making the world's most luxurious beds, designed to provide a sleeping experience like no other, bringing both physiological and physical benefits to you.

Hästens StyleStore is a showcase for the Hästens' range of luxury, traditionally hand crafted beds and accessories. 1500sq ft (of the 3000sq ft showroom) is dedicated to the prestigious Swedish bed maker displaying the full collection of Hästens beds. Ideally located, we deliver throughout the UK and Worldwide.

We offer exclusive Personal and Private Sleep Consultations and advice to anyone keen to experience their prestigious beds by our Hästens specialist sleep experts, trained in Sweden, who will be happy to advise you. Hästens StyleStore encourages clients to spend as long as they wish lying down in private in their showroom in order to fully evaluate the comfort of Hästens' beds.

The Hästens StyleStore showroom provides an aspirational and relaxing environment and has a contemporary Scandinavian emphasis on light, space and tranquillity.

In a world where more and more products are made by machines, Hästens continues to manufacture beds by hand. Hästens has built upon a tradition which has been passed on through five family generations since it was founded in 1852, before the light bulb, telephone and automobile was invented.

Health and well being are of paramount importance to Hästens. Hästens' beds are all hand crafted by true bed masters. By using only natural, non-allergenic raw materials including pine from the forests of northern Sweden, horse hair, pure wool, cotton and flax this ensures the highest quality of cushioning and comfort is achieved during the hours of sleep. The use of natural products also allows the beds to breathe at night maintaining your body temperature and helping you to have a better night's sleep.

By combining traditional craftsmanship with the latest in bed spring technology, Hästens has become market leader in Sweden and Holland with a fast growing presence in other international markets.

All Hästens beds come with a 25 year guarantee.

Hästens also produces an exclusive range of accessories including bed linen, nightwear and children's accessories.

Hästens not only make the world's most comfortable and luxurious beds enjoyed by thousands of people including celebrities and royalty, but is also committed to educating people about the science of sleep.
